## Report on Seminar

**Topic-Intellectual Property - Challenges in Science and Technology**

**Date: 18-05- 2019**

**Venue: Seminar Hall.**

**RESOURCE PERSONS- PROFESSOR P.S.MADNAWAT AND PROFESSOR M.P.DHOBAL  
(DEPARTMENT OF CHEMISTRY, RAJASTHAN UNIVERSITY).**

**Introduction:** The Seminar on Intellectual Property (IP) - Challenges in Science and Technology brought together experts, researchers, and professionals to address the evolving landscape of intellectual property in the realm of science and technology. The seminar aimed to explore the challenges and opportunities in protecting and managing intellectual property in these dynamic fields.

Discussion on the IP implications of emerging technologies such as artificial intelligence, biotechnology, and block chain

### Objectives-

- Balancing innovation with IP protection in rapidly evolving fields.
- Challenges faced by scientists in patenting their research.
- Strategies for scientists to navigate the patenting process effectively.
- Exploring the tension between open science practices and IP protection.
- Collaborative models for sharing scientific knowledge while respecting IP rights.
- Issues related to transferring technology from academia to industry.
- Case studies on successful technology transfer and IP commercialization.
- Examining ethical considerations in IP, especially in fields like, Chemistry, Biotechnology and Genetics. The Seminar on Intellectual Property - Challenges in Science and Technology provided a comprehensive exploration of the complex issues surrounding IP in the ever-evolving fields of science and technology. Attendees gained valuable insights into addressing challenges, fostering innovation, and navigating the intricate landscape of intellectual property in these domains.

**TITLE - IPR-CHALLENGES IN BUSSINESS ADMINISTRATION.**

**Date- 15 -03-2019**

**Venue- Seminar Hall.**

**Resource Person- Dr. Anil Mehta, Department of Business Administration, Banasthali Vidyapith, Jaipur, O.P. Chabra S.S.G. Pareek P.G. College, Jaipur.**

**Introduction:** The Seminar on Analytical Research Activities aimed to delve into the intricacies of analytical research methods, equipping participants with the knowledge and skills necessary for conducting effective analytical research across various domains. The seminar brought together researchers, academicians, and professionals seeking to enhance their analytical capabilities and contribute to evidence-based decision-making.

- Overview of various types of analytical research, including descriptive, exploratory, and explanatory research.
- Identifying the appropriate type for different research objectives.
- Principles of research design for analytical studies.
- Selecting suitable research designs for specific analytical research questions.
- Exploration of quantitative and qualitative data collection methods in analytical research. Strategies for ensuring data accuracy and reliability.

The Seminar on Analytical Research Activities provided a comprehensive exploration of analytical research methods, offering valuable insights and practical skills to participants. Attendees left with a deeper understanding of the analytical research process and enhanced capabilities to contribute to evidence-based decision-making in their respective fields. The organizers are commended for creating a forum that promotes excellence in analytical research.

## Report on Workshop

**Title:** Workshop on Enhancing Research Activities in Students.

**Date:** 18-12-2018

**Venue:** B.C.A. Department

**Resource Person-** Mr.Shekhar Jha

The Workshop on Enhancing Research Activities in Students aimed to empower students with the necessary skills, mindset, and resources to actively engage in meaningful research endeavors. The workshop provided a platform for students to explore the world of research, cultivate critical thinking, and develop a passion for contributing to knowledge in their respective fields.

- The importance of research in academic and personal development.
- Fostering curiosity and cultivating a passion for research.
- Recognizing the value of research in personal and academic growth.
- Basics of research design, data collection, and analysis.
- Understanding the different types of research.
- Importance of literature reviews in shaping research questions.
- Tools and strategies for effective literature review.

Participants engaged in interactive workshops and group activities. Workshops focused on research tools, literature review, and effective communication of research findings. The Workshop on Enhancing Research Activities in Students successfully ignited a passion for research and equipped students with the skills needed to embark on meaningful research endeavors. Attendees left with a heightened appreciation for research, a clearer understanding of the research process, and a strengthened sense of community within the research landscape. The organizers are commended for their efforts in promoting a research-centric cult.

## Report on Seminar

**Title:** Seminar on Research Methodology- Research Opportunities in the field of Botany.

**Date:** 28-11- 2018

**Venue:** Seminar Hall.

**Resource Person-** Dr. Somna Dutta (Associate Professor), Department of Botany, Rajasthan University, Jaipur.

**Introduction:** The Seminar on Research Opportunities in Botany provided a platform for botanists, researchers, and students to explore and discuss the diverse and exciting avenues available within the field of botany. The seminar aimed to inspire a new wave of botanical research, foster collaboration, and highlight the immense potential for contributions to scientific knowledge and environmental conservation like.

- Insights from a distinguished botanist on the current trends and future directions in botanical research.
- The role of botany in addressing global challenges.
- Exploration of cutting-edge research areas within botany.
- Genomics, plant-microbe interactions, and applications in biotechnology.
- Opportunities for research in biodiversity hotspots.
- Studying plant ecology for environmental conservation.
- The role of botany in discovering and developing medicinal plants.

The Seminar on Research Opportunities in Botany succeeded in showcasing the vast and exciting possibilities within the field of botany. Attendees gained valuable insights into emerging trends, innovative research areas, and the potential for impactful contributions to science and conservation. The organizers are commended for their efforts in inspiring and promoting botanical research.

## Report on Seminar

**Title: Seminar on Research Methods in Biological Science.**

**Date-29-09-2018**

**Venue: Science Department.**

**Resource Person- Swapnil patil –Sr.Engineer execution, Media Laboratories Pvt.Ltd.**

**Introduction:** The Seminar on Research Methods in Biological Science brought together researchers, academicians, and students to explore and discuss the latest advancements, techniques, and best practices in biological research. The seminar aimed to enhance the understanding of various research methods, foster collaboration, and promote excellence in biological science.

- Welcome address and introduction to the seminar's objectives.
- Overview of the importance of research methods in advancing biological science.
- Principles of experimental design and hypothesis formulation.
- Planning and conducting controlled experiments.
- Overview of molecular biology tools, including PCR, DNA sequencing, and gene expression analysis.

The Seminar on Research Methods in Biological Science was instrumental in providing a platform for knowledge sharing and collaboration in the field of biological research. Attendees gained valuable insights into cutting-edge research methods and best practices, enhancing their capabilities in designing and conducting impactful biological studies. The organizers are commended for creating a forum that contributes to the advancement of research in biological science.

- Practical insights into the application of molecular techniques in biological research.
- Techniques for cell culture and maintenance.
- Applications of cell culture in various biological studies.
- Overview of advanced imaging methods, such as confocal microscopy and electron microscopy.
- Applications of imaging in biological research.
- Strategies for conducting field research in biology.

## Seminar Report on Research Methodology -Nanotechnology in Green Chemistry.

Date: 27-09-2018

Venue:-S.S.G. Pareek P.G. College (Seminar Room).

Resource Persons- Professor Anshu Dandia (Ex. Head and Professor)  
Department of Chemistry, Rajasthan University, Jaipur.

**Introduction:** The Seminar on Nanotechnology in Green Chemistry and Their Management held at S.S.G. Pareek P.G. College aimed to provide participants with a comprehensive understanding of Nanotechnology concepts and effective strategies for their implementation in research. The principal Dr. N.M. Sharma welcomed the esteemed guests with a bouquet of flowers in the open function area of the institute. The seminar was attended by the faculty members and student representatives.

On 27-09-2018, the S.S.G. Pareek P.G. College conducted a seminar on Nanotechnology in Green Chemistry. Having welcomed our Guests of honour professor Anju Dandia (Ex. Head and Professor Department of Chemistry, Rajasthan University, Jaipur. She focused on that nanotechnology has emerged as a pioneering discipline with revolutionary research application in different fields like biomedicine, textiles, food, environment, and engineering.

## Report on Seminar

**Title: Seminar on Antarctica Research Abhiyan.**

**Date: 06-09-2018**

**Venue: Seminar Hall.**

**Resource Person- Professor M.K. Pandit, Department of Geology, Rajasthan University.**

The seminar started on at 10:00 am with Saraswati Vandana. There were many participants from S.S.G. Pareek P.G.College Banipark Jaipur. The dignitaries on the stage were Dr. N.M. Sharma, Principal, from S.S.G. Pareek P.G.College **Professor M.K. Pandit**, Department of Geology Rajasthan University, Dr.Anju Pareek Vice -Principal, S.S.G. Pareek P.G.College .

Dr.Pandit focused on research in Antarctica which covers a wide range of scientific disciplines due to its unique and extreme environment. He explained some areas of research in Antarctica include:

- Investigating climate change and its impact on the Antarctic region.
- Studying ice cores to understand past climate variations.
- Monitoring changes in sea ice and glaciers.
- Examining extremophiles (organisms that thrive in extreme conditions) to understand life in harsh environments.
- Studying the unique marine life, including adaptations to cold temperatures.
- Monitoring the impact of climate change on Antarctic ecosystems.
- Understanding ice sheet dynamics and glacial movement.
- Investigating the potential contribution of Antarctica to sea-level rise.
- Studying ice shelves and their stability.
- Assessing pollution levels and human impacts on the environment.
- Monitoring ozone depletion in the region.
- Studying the effects of increased tourism on the Antarctic ecosystem.
- Recording weather patterns and climate data.
- Studying atmospheric conditions and their impact on the region.

---

Research in Antarctica is often conducted by international collaborations, with scientists from various countries working together in research stations. The extreme conditions and isolation pose significant challenges to conducting research, but the findings contribute to a better understanding of Earth's climate, geology, and ecosystems. It's worth noting that environmental protection is a critical aspect of Antarctic research, and measures are taken to minimize the impact of human activities on this pristine environment.
