Aims and scope

*Please note that the *International Journal of Sustainable Energy* converted to a full Open Access journal from Volume 42 (2023). Previous volumes will continue to provide access through a Pay to Read model.

The *International Journal of Sustainable Energy* publishes the latest research on the science and engineering of sustainable energy systems. We publish research papers on:

- Renewable Energy Sources
- Sustainable energy efficiency and sustainable energy conservation
- Economics of sustainable energy systems
- Security of sustainable energy supply
- Novel sustainable energy technologies
- Educational and technological research papers on sustainable Energy

Within these sustainable energy topics, we are keen to promote research that explores:

- Solar thermal energy systems
- Photovoltaics
- Concentrated Solar Technology
- Wind energy systems
- Biomass and bioenergy
- Geothermal energy systems
- Marine and hydropower energy systems
- Combined and hybrid sustainable energy systems
- Smart grids
- Integration of energy systems
- Carbon capture and storage
- Energy design and the performance of buildings
- Sustainability in the urban environment
- Feasibility and viability of energy investments
- Energy and environmental policies
- Energy-focused education, training and certification schemes
- Social dimensions of energy and sustainability

All published research articles in the International Journal of Sustainable Energy will have undergone rigorous peer review, based on initial screening and single anonymized refereeing, by at least two independent expert referees. You can submit a paper using our [ScholarOne submission site](#), or for more information visit our [Instructions for Authors page](#).

Author benefits

We are abstracted and indexed in Scopus, EBSCO, and more.

The prestigious and experienced members of our international [Editorial Board](#) will guide you from submission to publication.

Our [Author Services](#) page provides you with tips and tricks to promote your research on social media and through your network. This includes 50 free e-prints to share with anyone you wish.

Quickly and easily track the impact your paper makes with the help of [AuthorWorks](#).

International Journal of Energy Research

The *International Journal of Energy Research* is a peer-reviewed open-access scientific journal published by John Wiley & Sons. It covers fossil, nuclear, and renewable energy sources, and research into energy storage. It was established in 1977 and the editor-in-chief is Akshay Kumar Saha.

Abstracting and indexing

The journal is abstracted and indexed in:

- [Chemical Abstracts Service](#)^[1]
- [Academic Search](#)
- [Aquatic Sciences & Fisheries Abstracts](#)
- [COMPENDEX](#)
- [Current Contents/Engineering, Computing & Technology](#)^[2]

Aims and scope

Informing energy policy, innovation and application through a critical analysis of deployment potential, the *International Journal of Ambient Energy* publishes high quality innovative energy research that demonstrates the potential for carbon reductions in real-world applications. The Journal reports original research, review papers, book reviews, applications and case-studies on all areas of this subject, including nuclear, hydroelectric, wind, biomass, solar, photovoltaic, tidal, wave and geothermal power. A critical analysis of theoretical and practical research facilitates a greater understanding of its potential use in alternative applications, use in different regions and ultimately greater acceptance in practice.

The Journal conducts rigorous single-anonymized peer review by both regional and international experts. With a unique combination of innovation and application, the *International Journal of Ambient Energy* aims to be an important reference source in new energy technology development.

Overview

Cell and Tissue Research is a scholarly forum publishing articles in the fields of molecular, cell, and supracellular biology.

Provides thorough coverage across the fields of molecular, cell, and supracellular biology.

Emphasizes on structure–function relationships as revealed by recombinant molecular technologies.

Serves as a platform for data analysis on the integrative actions of gene products and their impact on tissue structure and function.

Phytotherapy Research

Edited By: Angelo A Izzo

Journal

10991573

Available on Wiley
Online Library

Description

Phytotherapy Research is an international medicinal chemistry journal providing a pioneering resource for biochemists, pharmacologists, and toxicologists. We publish original medicinal plant research that advances knowledge and understanding. Our key areas of interest are pharmacology, toxicology, and the clinical applications of herbs and natural products in medicine. We particularly welcome papers about the effects of common food ingredients and standardized plant extracts. Papers, short communications, reviews, and letters are all accepted.

Description

Environmental Progress & Sustainable Energy is a journal of the American Institute of Chemical Engineers (AIChE), focusing on current world problems in energy and environment. We help chemical engineers, scientists, and policy-makers stay on top of direction-setting technological advances on topics such as climate change; sustainability and sustainable energy; air pollution; remediation and treatment of solid or aqueous wastes.

About this journal

Aims and scope

Buy a subscription

Journal of Energy

Please note that this journal only publishes manuscripts in English.

Readership: Professionals involved in energy extraction and conversion, as well as all those concerned with the relationship between energy and the environment.

Open access
We operate a rigorous single-anonymized peer review process, you can visit our [Instructions for Authors page](#) for information on preparing your manuscript.

Author benefits

We are abstracted and indexed in several databases including the Science citation index, Scopus and more.

The prestigious and experienced members of our international [Editorial Board](#) will guide you from submission to publication.

Our [Author Services](#) page provides you with tips and tricks to promote your research on social media and through your network. This includes 50 free e-prints to share with anyone you wish.

Quickly and easily track the impact your paper makes with the help of [Author Works](#).
